

When it comes to visiting the **DENTIST** are you a

Scaredy Cat?

Relax, we have solutions to ease your dental anxiety.

Each year millions of people avoid necessary dental care due to dental fear. In doing so, they sacrifice their dental health and minor problems rapidly become major ones.

Luckily, the dentist offers various forms of sedation depending on your level of comfort and dental fear severity. These options will alleviate any discomfort you may have and may even reduce the number of visits required to complete your dentistry. You can receive anesthesia or sedation for any type of dental work: from cleanings and fillings to root canals and extractions. We can replace crowns or dentures, restore sore gums to good health, whiten yellow or stained teeth, fix a chipped tooth, insert dental implants, and more.

	Conscious and Relaxed	Drifting In and Out of Sleep	Very Sleepy and Relaxed	Completely Asleep
Best for	Mild Anxiety	Mild to moderate anxiety	Moderate to severe anxiety	Severe anxiety
		Reduced number of visits	Wisdom teeth/ complicated extractions	Gag reflex Young children, especially those with extensive treatment required
